Parts of the ICE-60W Machine

Below is a list of the parts that come with the ice cream machine and a short description of each:

- Cap With Measurement Cup: Pour recipe ingredients through the spout. You can also use other ingredients (nuts, candies, etc.) without interrupting the freezing cycle.
- Easy-Lock Lid with Ingredient Spout: Transparent so that you can watch the freezing process. Lid is designed to easily lock to the base.
- Mixing Arm: Mixes ingredients in freezer bowl.
- Freezer Bowl: Contains cooling liquid within double insulated wall to create fast and even freezing.
- Control Panel: Select function with preset program time.
- Base: Contains heavy-duty motor system strong enough to handle ice cream, gelato, frozen yogurt, and sorbet.
- Rubber Feet: Keeps base stationary during use.
- Cord Storage: Unused cord is easily pushed to the bottom of the base.

Bowl Preparation

Below is a guide that tells users how to keep the freezer bowl frozen and how to determine if it is ready for use.

- Freezer bowl must be completely frozen before the recipe is begun.
- Always leave the freezer bowl in the freezer when it isn't in use.
- Freezing time takes between 12-24 hours.
- To determine if the bowl is completely frozen, shake it. If you hear liquid moving, then the freezing process isn't complete.

How to Choose "Ice Cream" on Cuisinart ICE-60W

You've found Cuisinart ICE-60W in one of your class rooms. You're ready to eat some delicious ice cream. But first, you must turn the machine on and select your treat.

For this task, all that you need is the ice cream machine.

1. Plug in the Cuisinart ICE-60W into a power outlet.
2. Press the power button located in the front of the machine.
3. Select the "Ice Cream" option on the control panel, located on the front of the machine.

How to Make Chocolate Ice Cream

If you want to make chocolate ice cream, then you've come to the right place. This task will tell you how to make chocolate ice cream using the ICE-60W machine.

Ingredients include:

- 2/3 cup of cocoa powder
- 1/2 cup of granulated sugar
- 1/3 cup of packed brown sugar
- 1 pinch of kosher salt
- 1.5 cups of whole milk

- 3.5 cups of heavy cream
- 2 teaspoons of pure vanilla extract

Steps:

1. Combine all of the ingredients in a cup or bowl
 2. Pour the combined ingredients into the cap with measurement cup
 3. Turn on Cuisinart ICE 60-W
 4. Select "ice cream" on the control panel
 5. Let the ice cream churn and thicken for 20-25 minutes
 6. Place ice cream into a tub place into freezer for 10-15 minutes
 7. Take ice cream out of freezer, scoop the desired amount into a bowl
 8. Add any toppings you want and enjoy!
- If you followed the instructions above, then you have successfully made chocolate ice cream.

How to Make Vanilla Ice Cream

Once the machine is turned on and you've selected the "ice cream" option on the control panel, you're ready to make your ice cream. This task will tell you how to make vanilla ice cream.

Ingredients include:

- 1.5 cups of whole milk
- 1 cup and 2 tablespoons of granulated sugar
- 1 pinch of kosher salt
- 3 cups of heavy cream
- 1.5 tablespoons of pure vanilla extract

Steps:

1. Combine all of the ingredients in a cup or bowl
 2. Pour the combined ingredients into the cap with measurement cup
 3. Turn on Cuisinart ICE-60W
 4. Select "ice cream" on the control panel
 5. Let the ice cream churn and thicken for 20-25 minutes
 6. Place ice cream into a tub, place into a freezer for about 10-15 minutes.
 7. Take ice cream out of freezer, scoop the desired amount into a bowl and enjoy!
- If the steps above are correctly followed, then you have successfully made vanilla ice cream.

Troubleshooting

Below is a list of the most common problems with the machine and how to fix them if they are encountered.

- **Problem:** The incorrect function was selected
- **Solution:** Reset the unit by pressing the start/stop button twice.
- **Problem:** The unit is beeping every few minutes
- **Solution:** Press the start/stop button, the process has completed.
- **Problem:** The unit stopped running
- **Solution:** Recipe is either complete or the load was too heavy. Press start/stop and let the unit cool before restarting.

- **Problem:** Finished recipe is too thin
- **Solution:** Place freezer bowl back in freezer.
